

ISSUE	REQUEST	HISTORY	LATEST	PROPOSED ACTION	PRIORITY RANKING
2993 Steam venting	Requested written responses to questions raised by PW on behalf of John Busby	While there has been much discussion around this topic and while responses have been provided (three years ago now), the issue which has not been resolved is that of monitoring. EdF argues that discharges are ALARP and within authorisation limits but this misses the point which is the company's obligation to be aware of the weather and deposition pattern of their steam venting which contains tritium and to notify those within the deposition area due to the potential health impacts.	Mr Parr has agreed to meet interested SSG members to 'clarify the steam venting monitoring'.	Accept this invitation and get EdF to provide estimates of the procedures/costs of accurate monitoring (wind direction, weather conditions and deposition) to determine best course of action.	HIGH
2998 Emergency planning	Clarity around the procedure and the DEPZ determination		Herca Wenra and inclusion of OSART report recommendations	EdF, ONR and SCC should between them ensure that the Herca Wenra and OSART recommendations are implemented as soon as possible and that the work undertaken to do so is overseen by a body which includes members of the SSG.	HIGH
2992 Public protection	What information is given to people	Awaiting response from PHE, Coffey MP and Mr Parr going back to 09/14 and 11/15. Chair proposed separate meeting on this issue 02/03/16.		Hold the meeting, make sure PHE, Coffey and Parr	MEDIUM

	within the DEPZ on range of radionuclides, half lives, bioaccumulation, impacts on health etc to which they are potentially exposed?			respond.	
2131 Where are deaths registered?	Is the place of death or place of residence used by PHE is calculating cancer statistics? And secondary questions.	It seems that the primary question was answered by Dr Bouffler at the 5/12/13 meeting – residential address is used as place of diagnosis and place of death. This presumably means that Ipswich Hospital will hold under-reported death statistics, but this is contrary to the conclusion drawn in the existing action tracker.	What are/were the secondary questions? The responses to these were circulated on 6/3/14 and considered by sub group on 2/4/14 but PHE still has not answered secondary questions according to existing action tracker. At 9/11/15, Chair was ‘to request assistance from NDA/DECC’.	Chair to clarify and either close this action or chase NDA for required help.	LOW
2191 effectiveness of food	To FAS: when redesigning the food sampling	June 2015 meeting, Cefas rep (Fiona Clyne) said a definitive reply would come after she spoke to colleagues.	Selwyn Runacres attended meeting in September	Write to FSA and ask for reply to the redesign	MEDIUM

sampling programme	programme, consider habitat versus food production sampling points		2016. This issue still requires an answer – i.e. will they redesign the programme to embrace SSG concerns?	question and seek presentation at next meeting.	
2325 DFS safety case issues to EA and others	Need written answers to 'relevant parts of the DFS safety case'.	Spent fuel is not categorised as a waste by HMG and therefore EA has no jurisdiction.	Awaiting reply to request for written answers from EA.	Write to EA and ask to expedite reply then close if satisfactory.	MEDIUM
2365 Contributions to NLF	How are the calculations made and what are the forecasts of anticipated costs?	Some information provided 14/10/14	Still awaiting detailed analysis of contributions.	Ask NDA to reply to this question about detailed analysis of contributions.	MEDIUM
2368a DECC representation at SSG meetings	Request that a representative attend a future SSG meeting.	Awaiting response at 29/9/14.	New request sent in May 2015.	Write again and/or explain to SSG that DECC are not interested in replying or attending and then close this action.	MEDIUM
2368b REPPiR	DECC – how is progress on revision of REPPiR going?	Inadequate response received 4/12/14.	Letter to Dr Coffey 9/11/15. No reply.	Write further letter to Dr Coffey.	HIGH
2531 Emergency planning	Please provide details of how monitoring for	This has been open since December 2014.		Ask Stuart Parr to provide this information.	HIGH

monitoring at Sizewell B	tritium is carried out and the results of that monitoring in respect of emergency planning.				
2959 Concern over integrity of RPV materials		Long history of interaction on this issue involving briefings by ONR, documentation from SSC and NFLA	ONR formal response received from ONR in November 2015.	Re-circulate ONR's formal response. Ask SSG if it is satisfied with ONR formal response.	HIGH
2899 Sewage outlets		Sizewell A has always received a pass result for the condition of its sewage effluent.	No information about SZB.	Ask EA to provide parallel information about SZB to confirm or question sewage water condition.	MEDIUM
2770 Promote awareness of Magnox largess schemes			Promotional leaflets required.	Ask Magnox to provide and distribute throughout community and wider.	LOW
3024 Blue Flag Status	Is monitoring for microbial activity carried out in the waters around Sizewell? If not, why not?	Question would be taken back to EA. What is the criteria and process for Blue Flag status?	Why is microbial monitoring not undertaken in the waters around Sizewell?	Ask EA to respond to this question and ask SCDC to give details about Blue Flag status and process.	MEDIUM
2935 Dry Fuel	CO2 footprint,	CO2 report provided.	Other data	Has chair sent this	MEDIUM

store details.	waste inventory, radionuclides half-lives and other information requested.		required was refused due to 'commercial and security sensitivity'. Chair to send Fol request.	Fol request? If not, it should be done.	
2920 Dr Coffey's voting choices on membership	To ask Dr Coffey to explain the rationale for the way she voted on membership of the SSG at the 11/9/14 meeting	Mr Abbot agreed to raise this with Dr Coffey		Ask for this matter to be responded to by Dr Coffey or her representative	MEDIUM
2932 NDA response to DFS	When does responsibility for DFS pass to the NDA?		Mr Cubitt to provide answer	Ask Mr Cubitt to respond.	MEDIUM
2973 Rateable value of DFS	What is the impact of the rateable value of the DFS on the value of SZB?	SCDC does not hold this information.	Awaiting reply from the Valuation Office.	Chase Valuation Office for a reply.	MEDIUM
2942 Discharge data regarding SZB steam venting (specifically Tritium) and impact thereof).	Please provide information required.	Meeting held between Chair and M R Crawford. EA and EdF to confirm what information could be provided prior to next outage in Spring 2016.		See 2993. This issues needs clarifying. Ask for definitive reply: is data for steam venting (weather, wind direction, volumes, radioactivity, deposition and	SEE 2993 HIGH

				potential health impact) possible to provide or not. If not, why not?	
2998 Fire and rescue service		What are the 'plans' of the fire and Rescue services including safety implications for the Sizewell sites?	Andy Osman to ask Chief fire Officer.	Needs clarification and action – ask Andy Osman for a response.	HIGH
3071 Trend in levels of strontium 90 from weapons testing.	What are the levels of strontium 90 in the atmosphere? Provide data.	EA agreed to comply.		Ask EA to provide data.	MEDIUM
3073 Neutralisation of neptunium		Mr Jenkin agreed to consult colleagues and report		Ask if a response is available.	MEDIUM
3074 Impact on waste management costs from AGR lifetime extensions.		Mr Jenkin agreed to consult colleagues and report		Ask if a response is available.	MEDIUM
3088 Arrange meeting with Mr Parr on steam venting		Meeting to still be arranged or has this happened?		Clarify please and action if necessary.	SEE 2993 HIGH
3097 Modelling traffic flow during an off-site emergency	SOG should be privy to this modelling report	Mr Moorcroft offered to discuss with CNC colleagues and invite them to the SOG meeting.		Needs clarity about the latest development and following up.	HIGH

3111 Emergency planning	When was the last extendability exercise undertaken?	Chair agreed to seek an answer.		To do.	HIGH
Potentially faulty components deployed in SZB reactor	ONR to explain how and on what grounds they gave permission for SZB restart when they have undertaken no direct inspection and to answer the question about the possible change in the safety case for the reactor as a result	The scandal of falsified paperwork concealing potentially flawed and 'carbonated' components from le Cruesot forge in France and Japanese steel suffering from the same problem has been in the news for months. Fears about safety in French reactors has caused the closure of 20 plants in France. There is uncertainty about the robustness of components in the SZB reactor and the ONR has failed to demonstrate satisfactorily to the SSG how their faith in SZB's safety has been determined.	ONR say that their assessment will not be completed until December but apparently feel confident in allowing the plant to continue operating while this assessment is on-going, thereby prejudging the outcome of their assessment.	SSG should employ an expert in this field to work with the ONR to provide the level of confidence on the plant's safety and on the absence of potentially faulty components.	HIGH – ESPECIALLY IN THE LIGHT OF INFORMATION SHOWING THAT THE COMPONENTS FOR HKC FAILED THE TESTS
3483 ONR Independence of ONR and consultation with the public	ONR – NGO forum, output, showing openness and transparency of ONR, reassurance they are totally independent.	Request for notes ONR NGO forum, for info to members. Chair to write to ONR to request.			
3484 Regulator's code	What will be impact from the economic impact	Mr Maitland agreed to obtain from the ONR and provide the expected timing in which the report will be released. The ONR are in the process of responding with their			

	assessment on the regulators code	position on the findings, which will also be published. Once released, the links can be provided. It was agreed that a link for the Regulator's code would also be circulated – please see https://www.gov.uk/government/publications/regulators-code			
3488 Casks	casks have a 25 year life span and will be inspected at 10 year intervals have any similar build casks have lasted their lifetime yet.	Mr Caton agreed that EDF will provide a response as the operator whether a Holtec container 25+ years old exists around the world.			
3490 Euroatom membership	Membership of Euratom will cease and the ONR will assume responsibility, providing a similar service to Euratom in regards to inspection and audit. Over the next 2 years the ONR will be building their capabilities in order to provide the same safeguard	Chair asked for the ONR/BEIS to provide more information on the impact of Brexit on regulations and what the ONR will be doing in the interim.			

	activities.				
3491 Waste storage	If more storage needed would it require a further planning application giving an opportunity for feedback?	Chair agreed that she would think of a question and raise with The Department for Business, Energy and Industrial Strategy (BEIS) as to how it fits with government policy.			
3498 DEPZ evacuation	The European Basic Safety Standard Directive is due for enactment into current law by February 2018 which is being negotiated through BEIS and the ONR.	Clarify ONR Responsibilities for this directive?
