

## Chairman's Report

### Hinkley Point SSG meeting June 2022.

This is our third 'Face to Face' meeting and it is good to be back in the full swing of things. Just lately I seem, along with one or two others seem to be spending quite a bit of time at the Canalside

The Elections in May really did bring in some surprises. As a non-political group I am convinced we will continue to keep the information going and keep everybody up to speed with developments in the decommissioning of A and B sites. I have been appointed with one other to represent the new Somerset Council on this group. Sedgemoor D.C and Somerset West and Taunton D.C will cease to be on the 31 March 2023. I would therefore suggest that the Membership group meet to discuss the membership of the New Somerset Council

We are now fast approaching the final weeks of generation of Hinkley 'B' and the start of de-fuelling. Mervyn and I went on site on the 1 June and onto the Pile Cap on R3. There will be a visit to 'B' site organised for the SSG on Friday the 22 July 09.30 to 13.00.

Mervyn and I will also be on 'A' site on the 20 June prior to the SSG on the 24 June.

NuLeAF (Nuclear Legacy Advisory Forum) Will be visiting Somerset on the 15 & 16 June. I do not think they will be visiting A, B or C but will be holding their conference at Cannington Court. I will be attending, as their new Vice Chairman, very short lived, I must add, as I am appointed by Sedgemoor.

I will be looking forward to seeing you all at our meeting on the 24 June at the Canalside. I think Bacon Buns Etc will be available.

Mike
