

# Site Stakeholder Group Corporate Report Autumn 2022

# Regeneration

- Our organisation has an exciting future ahead as we double in scale and scope over the coming years. And today's missions – being responsible for the safe and secure decommissioning of 12 nuclear sites and operation of one hydro-electric plant – remain as vital as ever.
- To position ourselves to best achieve current and future missions we need to transform and to support that have launched a Regeneration Programme.
- The programme is starting to define what we want to look like in the future, what we will represent and for what we, as a business, want to be recognised. Our workforce is playing an essential role in this work to help define our vision, mission and values.

# Future Missions

- The Future Missions team, led by Nigel Houlton, is responsible for Magnox's strategy for integrating new decommissioning work scope into our existing portfolio.
- Two key aspects are Magnox joining with Dounreay under a single licensee board by April 2023 and transferring and decommissioning EDF's seven advanced gas-cooled reactor sites, post-defueling.

# External Communications

- We engage closely with local communities and stakeholders around our sites via networks such as the SSGs, but to reach a wider audience we use a wide range of media.
- Traditional media including newspapers, radio, TV, and online news
- Social media networks such as [LinkedIn](#) and [Twitter](#). We are also exploring whether we can engage with younger audiences on TikTok and Instagram, and have a [YouTube](#) channel where we host a series of videos about our work.

- Find us on LinkedIn by searching Magnox Ltd

# Employee Engagement

- Earlier in the year Magnox ran an engagement survey with its employees, which highlighted areas of ongoing improvement that the company wanted to address. These included ensuring there were more opportunities to celebrate collective accomplishments and receive updated information about Magnox's forward-looking strategy.
- We were very proud that Magnox teams won four gongs at the NDA awards for their ongoing commitment to delivering our mission. The awards spanned sites including Wylfa, Dungeness and Harwell, as well as recognising individual contributions in the areas of safety and our important staff networks.

# Delivery – Spotlight on asbestos

- Our commitment to removing and remediating asbestos material from our sites has continued this year, with significant project milestones already being hit.
- Work at Wylfa and Hinkley Point are key contributors to delivering the company's overall target.
- The project at Hinkley Point has now completed asbestos removal from the reactor 1A boiler house, which involved 100,000 hours of work and resulted in an area larger than one and a half football pitches being cleaned by hand.
- The deaerator asbestos removal project at Wylfa is well over the half-way mark, and the project is making great strides into their 2022/23 target.
- The work follows significant success during 2021/22, when more than 24,500m<sup>2</sup> of asbestos was removed from across the Magnox fleet, exceeding the target set by the Nuclear Decommissioning Authority.

# The Magnox Socio-economic Scheme

- In support of the NDA's responsibilities under the Energy Act (2004), Magnox manages and disperses a funding portfolio of around £1.02 million each financial year across our 12 Magnox
- Over £100,000 to support large transformational projects
- Up to £10,000 capital expenditure towards projects helping build sustainable communities.
- Up to £2,000 for small, good neighbour funding projects close to Magnox sites of which £6,000 is ringfenced annually for each site.
- In 2021/22, the full £1.02m was disseminated across our sites
- In addition, six projects totalling £964k were directly funded by the NDA and managed by Magnox bringing nearly £2m worth of investments to our surrounding communities last year.
- More information on the scheme, funding criteria and online portal is available at: <https://www.gov.uk/government/collections/magnox-working-with-our-communities>
